Subject: Dimock: information re: resampling

Shawn asked that I share the attached draft information regarding re-sampling. The first file summarizes the rational for re-sampling by category of original findings. The second is a home by home analysis showing what we found vs trigger and health based levels. The third file is a draft timeline for re-sampling. Because decisions still need to be made, the timeline is generic and starts with when we make the decision to move forward... it may change depending on the decision. Please let know if this is what you are looking for or if you need additional information. We can talk about this at the 4:30 call.

Thanks

Ron
